

“Every child in Delaware deserves access to a high-quality pre-kindergarten program, and families will more easily afford these services for their children. We call on policymakers to enact high-quality universal pre-K in mixed delivery settings including community-based providers, center-based programs, Head Start, and public schools. Universal pre-K should be voluntary, full day pre-K accessible to all four-year-olds regardless of family income available statewide by 2024.”
